

# FACILITATING LEARNING EXPERIENCES

Learning experiences build on existing knowledge (**something familiar**) and invite children to extend their thinking in a way that balances safety and risk (**curiosity**).

Optimal learning allows kids to construct knowledge through exploration and investigation, with time to both tinker and think about where they are, what they are doing, and what's happening.

LEARNING EXPERIENCES ARE:

Spontaneous

Meaningful

Exploratory

Intentional

Actionable

## INVITE INVESTIGATION!

How can you facilitate learning experiences? By nurturing and responding to your kids' curiosity in a way that invites investigation! Ask open-ended questions, take interest in their activities, and talk about the world around you.

## IT'S A PROCESS

Learning builds a new and deeper understanding about the world by acquiring and refining skills.
