

# 3 INGREDIENT BATH PAINTS

Is it bath time or play time? Make it both! Mix your own washable bath paints and watch your kids unleash their creativity until the water gets cold.

## SUPPLIES

Baby Bath Soap  
or Kid Shampoo

Cornstarch

Liquid Food Coloring

For every color you want to do, you will need  $\frac{1}{4}$  cup bath soap and  $\frac{1}{4}$  cup cornstarch, so 1 cup of each for 4 colors.

## INSTRUCTIONS

- 1 Mix the soap and the cornstarch together in a medium bowl until it gets gooey.
- 2 Separate the mix into smaller bowls (or small jars with lids to store for later).
- 3 Add a few drops of food coloring to each bowl and mix well.
- 4 Head to the bathtub and get creative! Your kids can use their hands to paint (which makes this a great sensory activity), or use paint brushes (which works their fine motor skills), or sponges, or whatever they come up with!
